COVER SHEET REPLY WITH AMENDMENTS 06/11/05 or (06/13/05) as falls on a Saturday.

ED434507733US

ATTENTION: FRONT OFFICE AND EXAMINER: MR. AARON F. ROANE (ART 3739):

This is **NOT** a MISCELLANEOUS letter. It is a supplement reply with Claim Amendments to the applicant's, Shirley B. Koffroth's, EARLY reply of the non-final office action of

Application: 10/816,420 within the 90 day deadline given for the reply and amendments.

Mailed: 03/11/2005 (the returned postcard, receipt stamp dated 04/11/05, copy enclosed.

REPLY DOCUMENTS SUBMITTED 04/11/2005: And NOT properly sent to Mr. Roane's

Docket of Case 10/816,420, until 06/03/2005!

1. PART 1: Reply in reference to rejection of Claim 1. (11 Pages)
2. PART 2: Reply in reference to rejection of Claim 2. (10 Pages)
3. ATTACHMENTS:

NEW CLAIMS (AMENDMENTS)

06/11/2005 CASE 10/816,420

1. An Ice Belt To Reduce Body Temperature and avoid heat exhaustion when the user is engaged in sports & exercise under high climatic conditions, comprising:

a strip of sturdy cotton material of sufficient length and width to gird the waist from the midriff down;

said strip made of any sturdy cotton fabric approximately 4 to 5 inches wide and the length depending on the user's waistband measurement;

ample lengths of Velcro hand-adjustable fasteners for closing the belt around the user's waist, thus making possible the adjustment needed for expanding or disbanding waistband changes of the Ice Belt's user;

said Velcro fasteners long enough to accommodate various size possibilities: small, medium, large, extra large, etc., the measurements depending on whether the user is a child, adolescent, man or woman, heavy or thin.

2. An Ice Belt as defined in Claim 1, containing a strip of sturdy cotton material of sufficient length and width to gird the waist from the midriff down with its corresponding ample lengths of hand-adjustable Velcro-type fasteners;

pocket-like receptacles sewn in a continuous row to the entire width and length of the strip of sturdy cotton material on the innermost body-contacting side of the belt to hold flexible bags of blue or treated ice with the option of removing them for refreezing when the ice within melts or;

NEW CLAIMS (AMENDMENTS)

06/11/2005 CASE 10/816,420

the option of putting the Ice Belt in its entirety into a freezer compartment until the liquid in the bags refreezes; this convenience particularly useful when the user is wearing an armored shield as used in Martial Arts, or a Bullet proof vest-both insulating devices which can double the ice's duration.

3. An Ice Belt as recited in Claim 1, comprising a strip of sturdy cotton material of sufficient length and width to gird the waist from the midriff down; 4 to 5 inches wide and the length depending on the user's waistband measurements; containing ample lengths of Velcro as fastening means which can accommodate to various expanding conditions and size possibilities; and further containing pocket-like receptacles sewn in a continuous row to the entire width and length of the strip of sturdy cotton material on the innermost body-contacting side for the placement of blue or treated ice bags that can be removed for refreezing when the ice melts or one can use;

the option of putting the Ice Belt in its entirety into a freezer compartment until the liquid in the bags refreezes; this convenience particularly useful when the user is wearing an armored shield as used in Martial Arts, or a Bullet proof vest as recited in Claim 2 and the Disclosure;

nonetheless, for this possibility to be structurally feasible; we furthermore make claim here, as Claim 3, that the belt would then not contain fastening means on the inner side of the upper portion of the pocket-like receptacles to secure the ice bags from falling out, but would contain;

NEW CLAIMS (AMENDMENTS)

06/11/2005 CASE 10/816,420

pocket-like receptacles permanently closed to accommodate refreezing of the Ice Belt in its entity when the ice melts.

NON PROVISIONAL PATENT APPLICATION 10/816,420 CLAIMS

INVENTION : : - Ice Belt To Reduce Body Temperature

INVENTOR : : - Shirley B. Koffroth(US Citizen)

CLAIMS

What I claim as my invention is:

1. An Ice Belt To Reduce Body Temperature as described below;
a strip of flexible material of sufficient length and width to gird the waist from the midriff down, said strip having a body contacting side and an opposite outwardly facing side and an upper edge and lower edge;

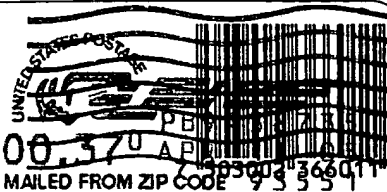

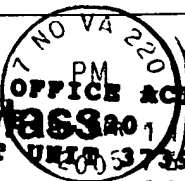

pocket-like receptacles secured to the innermost body contacting side of the Ice Belt for the placement of frozen-flexible ice bags--type blue or treated ice; the said belt further contains;

connecting means to secure the upper and lower edges of the belt together and hold the belt in folded condition with the pocket-like receptacles inside the fold and the strip of flexible material to the outside thereof.

2. The belt of claim 1, containing pocket-like receptacles attached to a strip of flexible material for the placement of ice bag's--type blue or treated ice--furthermore contains:

fastening means on the inner side of the upper portion of the pocket-like receptacles; thus securing the ice bags from falling out, and facilitating the removal of the ice bags at intervals for refreezing when the ice melts; depending on the temperature, body functions, and outer garment of the user while wearing the Ice Belt.

04/11/05: REPLY TO NON-FINAL OFFICE ACTION
